Co. Cork.*

HELIO Gas Detection has carried out all of our office Landfill Gas monitoring in accordance with the Conditions of our Waste Licence since 2008. We find them to be knowledgeable and highly competent in the discipline of Calibration, Instrumentation & Gas monitoring. All aspects of the project management and project design and delivery were of the highest standard. Nothing was too much for them, despite numerous final stage amendments. They continue to provide excellent service to us.

A handwritten signature in black ink, appearing to read 'J O'Brien', written over a horizontal line.
